DIRECTOR'S MESSAGE

HARIPRIYA™ CONSULTANCY SERVICES PRIVATE LIMITED
INNOVATION & DELIVER

At **Haripriya Consultancy Services Private Limited,** we believe that engineering is not just about calculations, but about responsibility, safety, and long-term value.

With a strong foundation in structural engineering and industrial design consultancy, our focus has always been to deliver practical, economical, and code-compliant solutions tailored to each client's specific needs. Every project we undertake is approached with technical discipline, attention to detail, and a clear understanding of site realities.

Our commitment is to support our clients through transparent communication, timely delivery, and uncompromising quality standards. We continuously upgrade our knowledge, tools, and processes to stay aligned with IS, BIS, ISO, and international best practices.

As we move forward, our vision is to build long-term partnerships by consistently delivering safe, efficient, and sustainable engineering solutions that contribute to the growth of industries and infrastructure.

We thank our clients, associates, and team members for their trust and support, and we look forward to working together to shape stronger and smarter structures.

Hareshbhai P. Vaghasiya
Director : Haripriya Consultancy Services Private Limited

WE DELIVER WHAT WE COMMIT AND
WE COMMIT WHAT WE CAN DELIVER.

OUR MISSION

To create awareness across India about the benefits of steel structures over conventional RCC construction, promoting sustainable building practices that reduce pollution and environmental impact.

We envision delivering more and more projects nationwide, contributing to a cleaner, greener, and more efficient built environment through innovative and responsible structural engineering.

OUR VISION

To become a leading structural engineering consultancy in India, with a strong presence across the country, creating employment for more than 200 professionals within the next ten years.

We aspire to deliver the maximum number of steel structure projects. contributing to national infrastructure growth, sustainable construction practices, and the overall development of the country.

WE DO IT

- Industrial Structural Design (Heavy & Lightweight)
- RCC And Steel structural analysis & Design
- Pre-Engineered Building (PEB) Design & Detailing
- Tekla Structures 3D Modelling & Detailing
- Pipe Rack Structure Design
- FMCG, Warehouse & Logistics Building Structures
- Oil & Gas Refinery Structural Design
- Power Plant & Process Plant Structures
- Crane Girder & Heavy Equipment Support Design
- Composite Structure Design (Steel + RCC)
- Foundation Design (Isolated, Combined, Raft, Pile Foundations)
- Structural Stability & Optimization Studies
- Design Review, Checking & Proof Consulting
- As-Built Drawings & Construction Support

DYNAMIC & ADVANCED STRUCTURAL ANALYSIS

- Dynamic Analysis of Structures (Seismic & Wind-Induced)
- Earthquake Analysis (Response Spectrum & Time History Methods)
- Wind Load & Vibration Analysis for Industrial Structures
- Dynamic Analysis of Pipe Racks & Process Structures
- Machine Foundation Dynamic Analysis
- Equipment-Induced Vibration Assessment
- Crane Load & Moving Load Analysis
- Model & Natural Frequency Analysis
- Structural Stability under Dynamic & Impact Loads
- Seismic Retrofitting & Strengthening Recommendations

LEGAL & PROFESSIONAL ASSOCIATIONS

ISO 9001:2015 Certified Company

Firm registered with Ministry of Corporate Affairs **(MCA),** Government of India

GST Registered with Government of India

Udyam Registered under **MSME**

Trademark Registered with Government of India

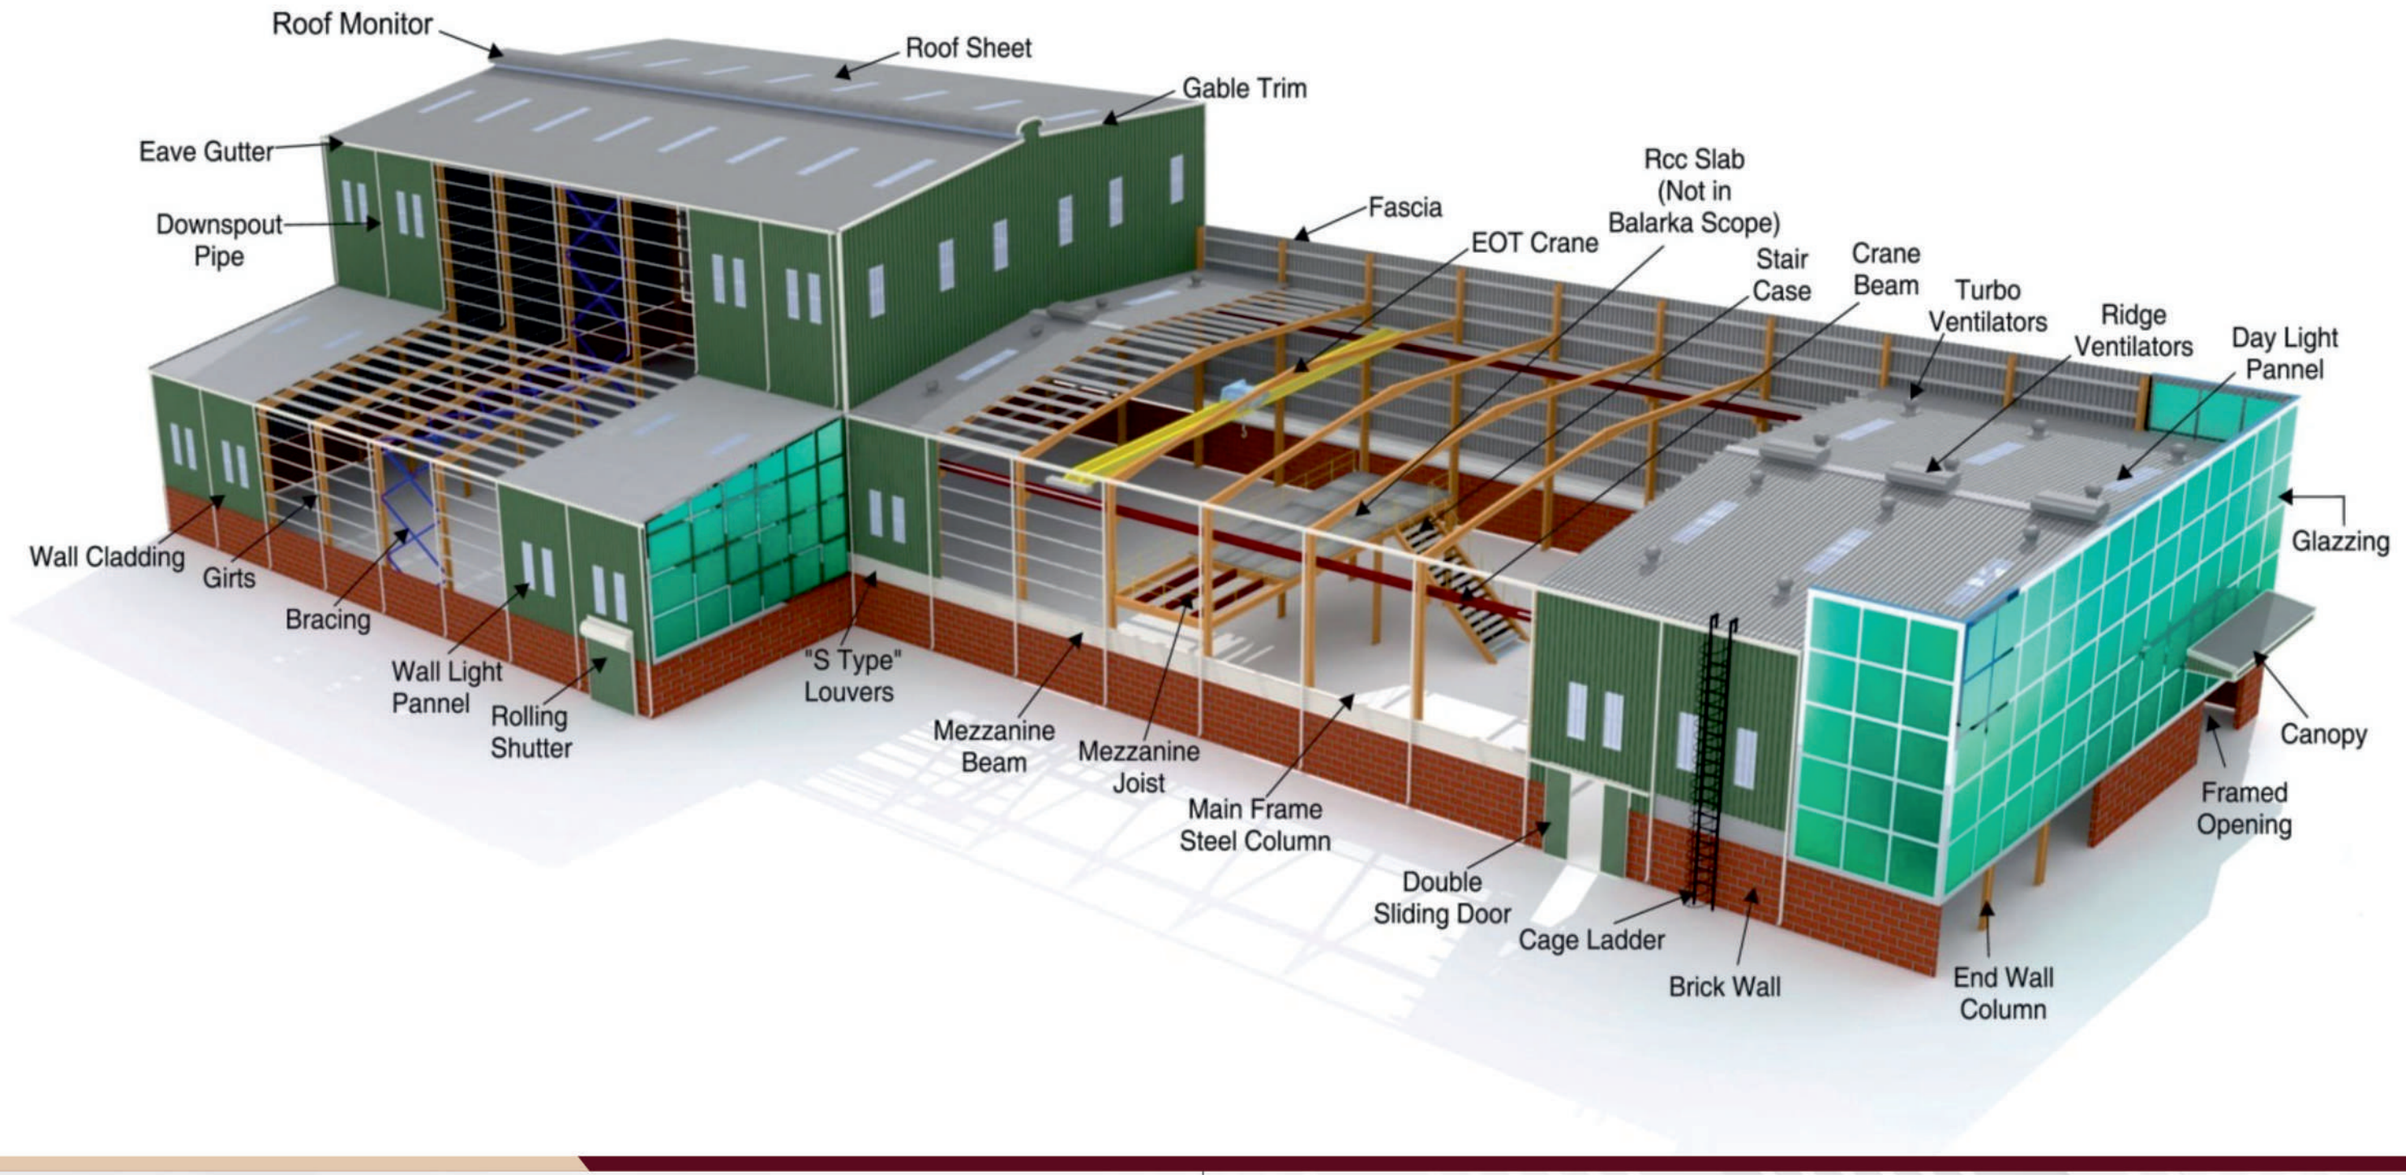

Engineer on Record (EOR) - Surat Municipal Corporation

Structural Engineer on Record (SEOR) -Surat Municipal Corporation

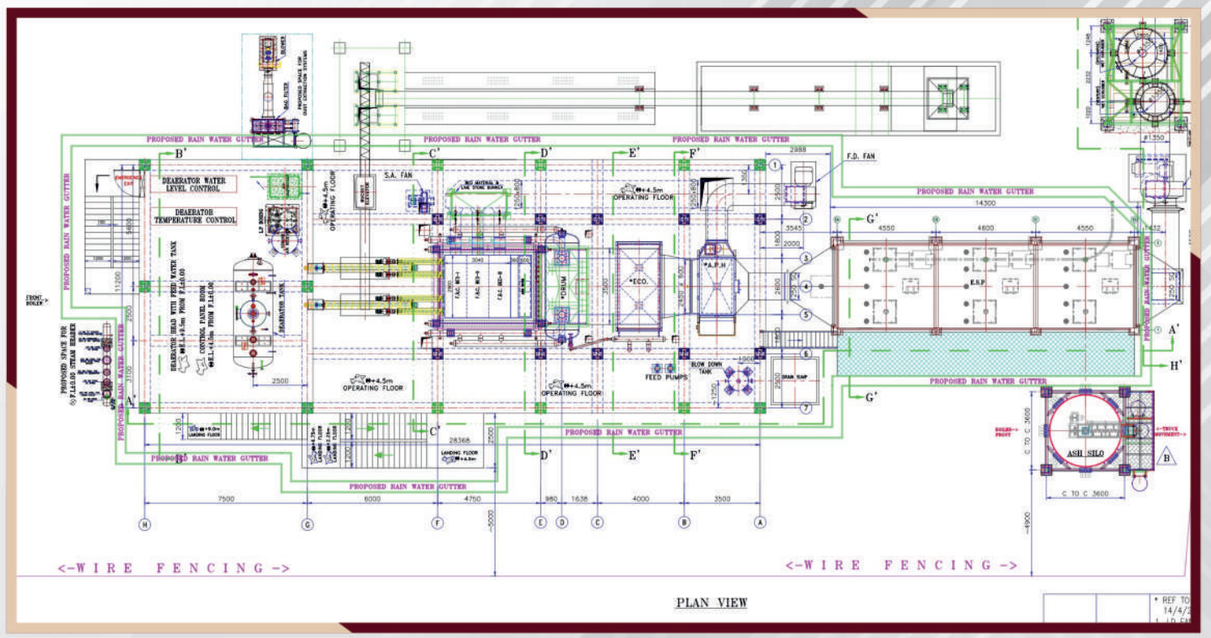

Chartered Engineer - Member of The Institution of Engineers (India)

Life Member of Indian Society of Structural Engineers (ISSE)

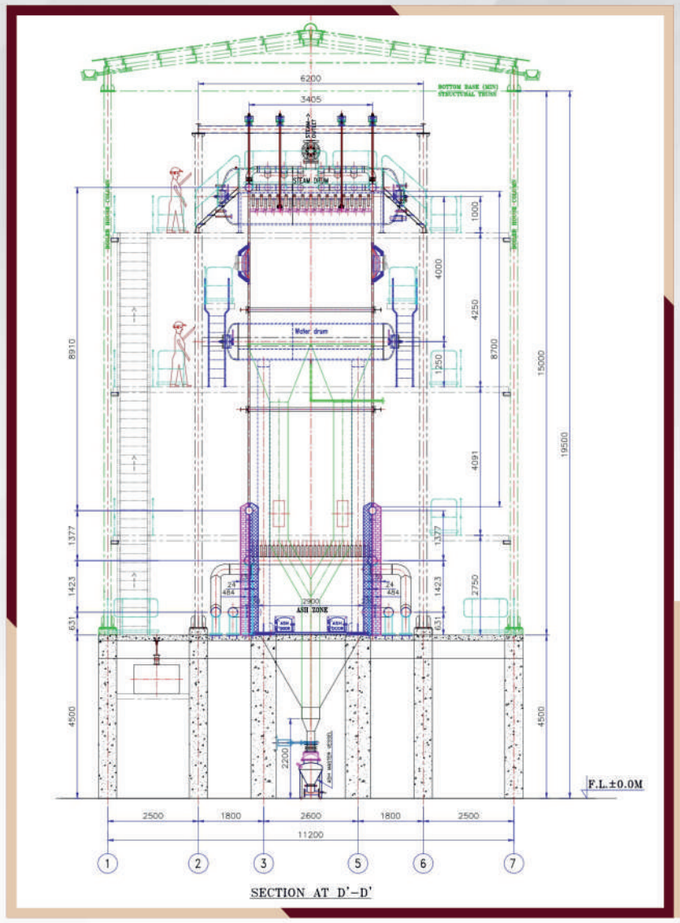

Life Member of Institute for Steel Development and Growth (INSDAG)

WORK PROCEDURE

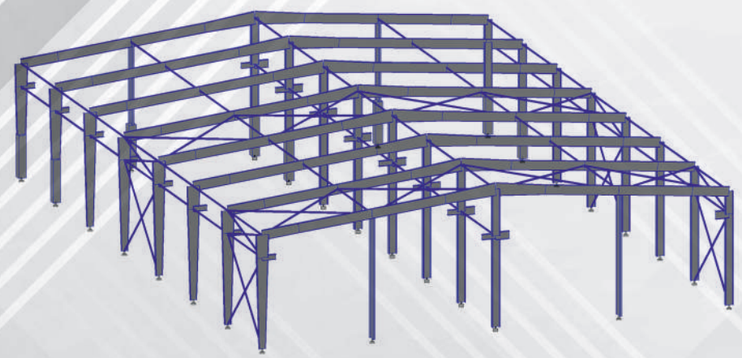

PLAN VIEW

SECTION VIEW

- Client Requirement
- Site/Project Study
- Concept Planning (Plan, Elevation & Sections)
- Client Approval
- Structural Analysis & Design
- Detailed Engineering
- Drawing Review
- Manufacturing Support
- Erection Support
- Quality Assurance
- Successful Project Completion

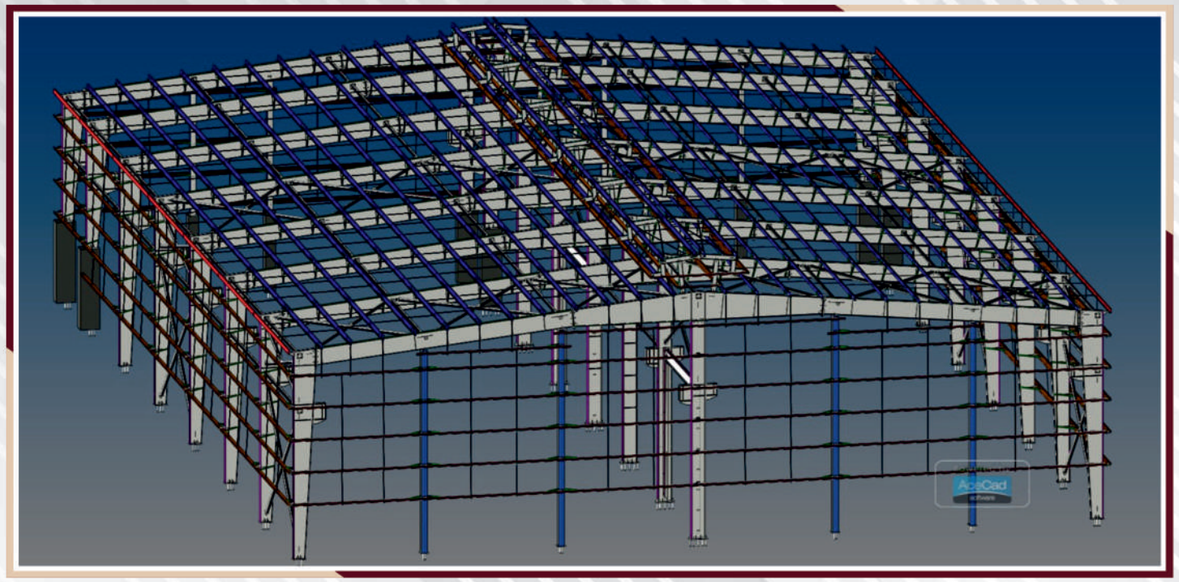

STAAD MODEL

STRUCTURAL ANALYSIS & DESIGN

After receiving approval, our engineering team performs complete structural analysis and design.

This Includes:

- Dead Load Analysis
- Live Load Analysis
- Wind Load Analysis
- Seismic Analysis
- Crane Load Analysis (if applicable)
- Load Combinations
- Member Design Optimization
- Connection Design
- Foundation Reaction Calculation
- Stability and Serviceability Checks

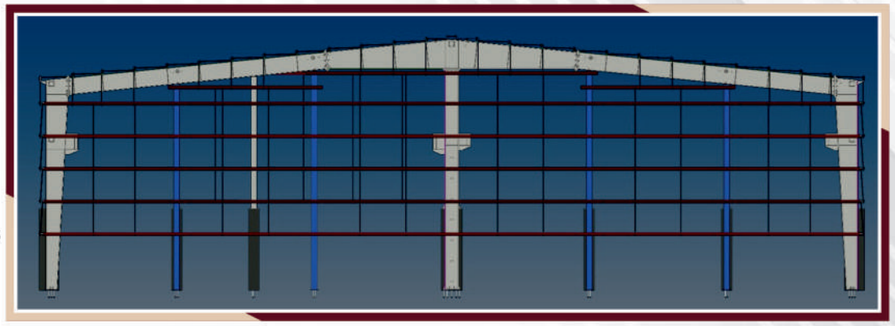

DETAILED ENGINEERING & SHOP DRAWINGS

Once the structural design is completed, we prepare detailed fabrication drawings including:

- General Arrangement Drawings (GAD)
- Anchor Bolt Layout Fabrication Drawings
- Assembly Drawings
- Erection Drawings
- Connection Details
- Bill of Materials (BOM)
- Bolt Lists
- Plate Details
- Sheeting Layout Drawings
- Trim Drawings

MODELING AND DETAILING

CIVIL DESIGN OVERVIEW

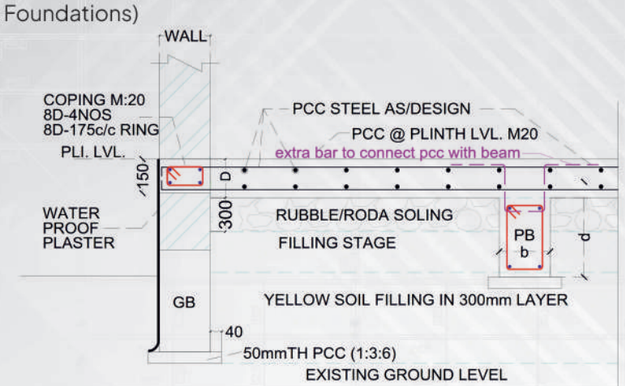

CIVIL DESIGN SERVICES

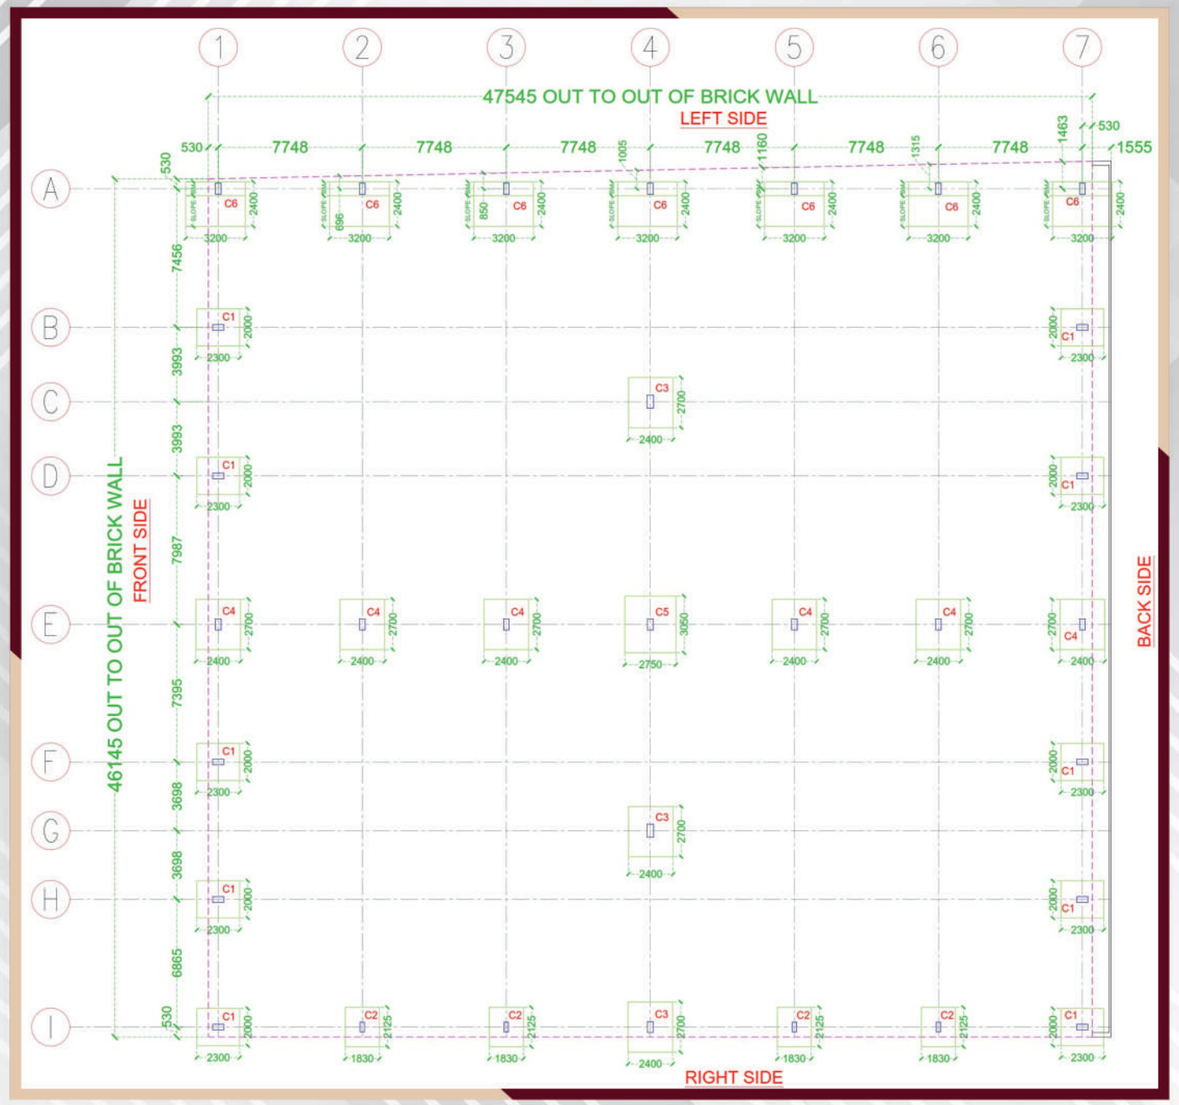

Our Civil Design Services provide complete structural engineering solutions for industrial, commercial, residential, and institutional projects. We focus on delivering safe, economical, and code-compliant RCC designs tailored to each client's requirements. From architectural planning and foundation design to detailed structural drawings and construction support, our experienced engineering team ensures accuracy, quality, and timely project delivery. Every design is optimized for structural stability, cost efficiency, and ease of construction while complying with the latest Indian Standards (IS Codes).

CIVIL ENGINEERING SERVICES

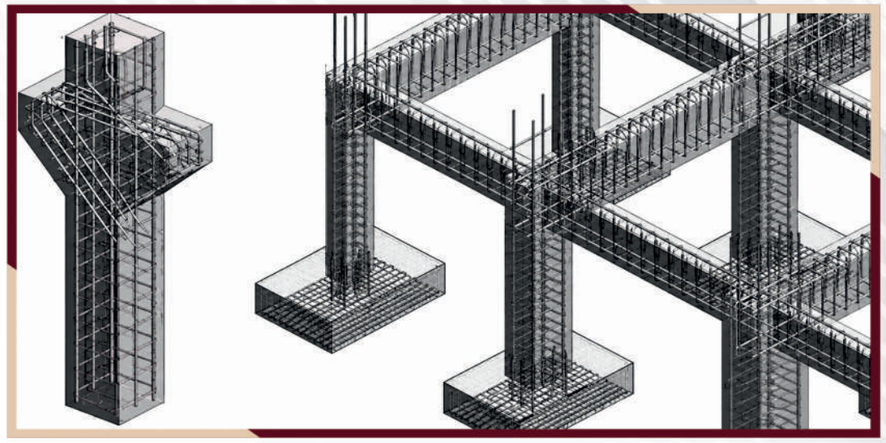

- Architectural Planning & Space Optimization
- Site Planning & Master Layout Development
- RCC Foundation Design (Isolated, Combined, Raft & Pile Foundations)
- RCC Column Design
- Ground Beam Design
- Plinth Beam Design
- Tie Beam Design
- Grade Beam Design
- Retaining Wall Design
- Underground Water Tank & Sump Design
- Overhead Water Tank Supporting Structure Design
- Industrial Flooring & Pavement Design
- RCC Staircase Design
- Mezzanine Floor Design
- Boundary Wall Design
- Drainage & Storm Water Layout
- Construction Drawings & Good for Construction (GFC) Drawings
- Technical Support During Construction

SECTION OF GB, PB, COPING, & PCC DETAIL

We provide comprehensive RCC Structural Design and Steel Detailing Services for industrial, commercial, residential, and institutional projects. Our engineering solutions are tailored to meet each client's specific requirements, ensuring safety, structural efficiency, cost optimization, and compliance with the latest Indian Standards (IS Codes).

OUR COMMITMENT TO SAFETY

Safety is our foremost priority. We ensure that every project is designed with rigorous engineering principles, strict adherence to applicable codes and standards, and comprehensive quality checks. From concept to completion, our focus is on delivering structurally sound, safe, and sustainable solutions that exceed client expectations.

"Designing Strong Foundations for Sustainable Infrastructure."

TEKLA STRUCTURES DETAILING SERVICES

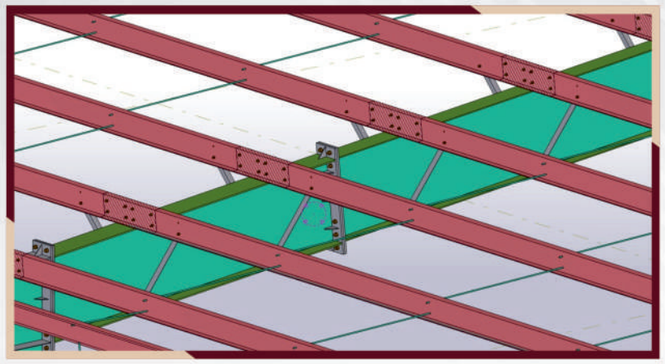

Using Tekla Structures, we deliver highly coordinated and constructible models that enhance collaboration between designers, fabricators, and site teams, ensuring every steel component is manufactured and erected exactly as intended.

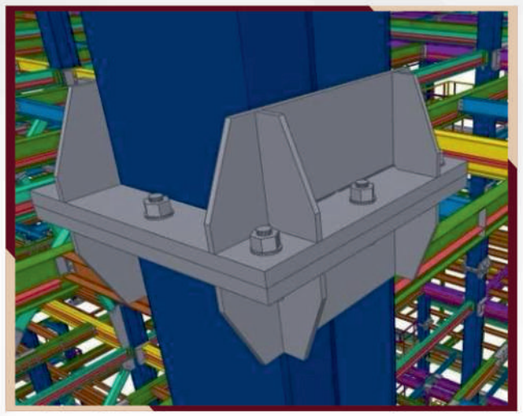

OUR TEKLA DETAILING SERVICES INCLUDE

1. 3D Steel Modeling

- Complete BIM-based steel structure modeling
- Industrial buildings & PEB structures
- Multi-storey steel buildings
- Pipe racks
- Conveyor galleries
- Mezzanine floors
- Canopies & shelters
- Warehouses
- Crane supporting structures

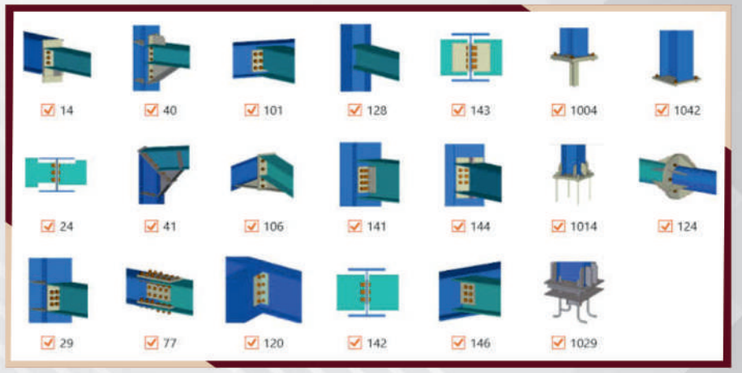

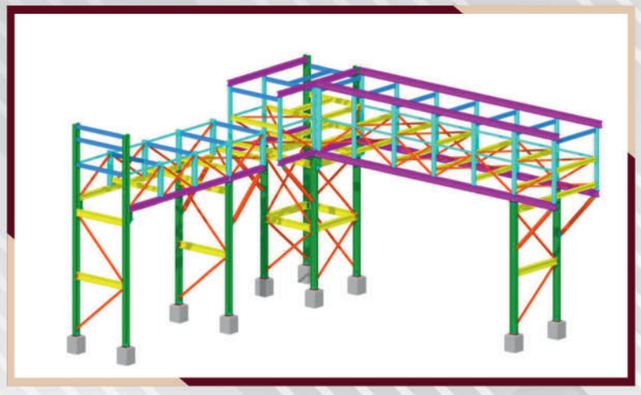

2. Fabrication Shop Drawings

- Single Part Drawings
- Assembly Drawings
- GA (General Arrangement) Drawings
- Anchor Bolt Layouts
- Erection Drawings
- Connection Drawings
- Plate Details
- Miscellaneous Steel Drawings

3. Connection Detailing

- Beam-to-Beam Connections
- Beam-to-Column Connections
- Column Splice Connections
- Base Plate Connections
- Bracing Connections
- Truss Connections
- Purlin & Girt Connections
- Stair Connections
- Handrail Connections
- Ladder Connections

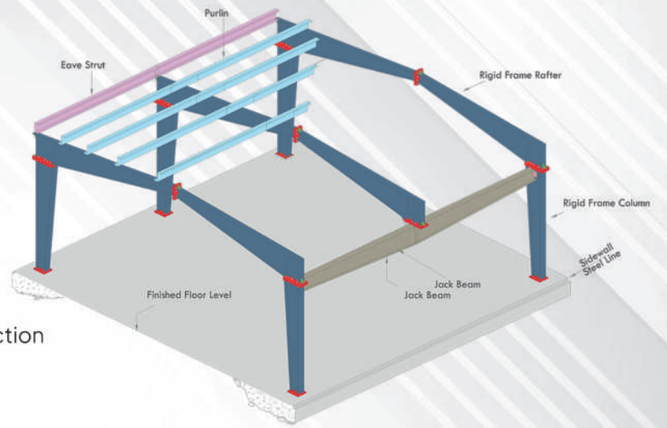

INDUSTRIES WE SERVE

- Pre-Engineered Buildings (PEB)
- Industrial Plants
- Manufacturing Facilities
- Warehouses
- Commercial Buildings
- High-Rise Steel Structures
- Pipe Rack Systems
- Power Plants
- Cement Plants
- Pharmaceutical Plants
- Oil & Gas Facilities
- Food Processing Plants
- Infrastructure Projects

WHY CHOOSE OUR TEKLA DETAILING SERVICES?

- Accurate 3D BIM Modeling
- Fabrication-Ready Shop Drawings
- Error-Free Connection Detailing
- Clash-Free Coordinated Models
- Faster Fabrication & Erection
- Optimized Material Utilization
- Reduced Rework & Project Delays
- Compliance with International Standards
- Quick Turnaround Time
- Complete Engineering Support from Design to Erection
